New Delhi Airport Building, Indira Gandhi International Terminal, India

New Delhi Airport, India : Indira Gandhi International Terminal 3

IGI - Contemporary Indian Air Terminal Building - design by EDAW/AECOM, Architects

1 Nov 2013

New Delhi Airport Terminal 3

Design: EDAW/AECOM; Landscape: Odyssey

Terminal 3, IGI One of the prime infrastructural projects in New Delhi

The new Terminal (T3) at the Indira Gandhi International (IGI) Airport is designed with many unique landscape features. Odyssey was awarded the Hardscape and Water Features work for this iconic project.

photograph : Rajesh Suneja

HARDSCAPE

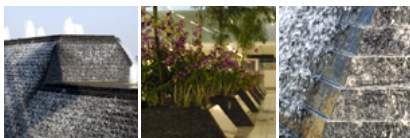

The Scope of Work under Hardscape included 858 Movable Planter Boxes, 750 RMT of Fixed Planters in Steel Grey Granite, a Landscape Deck and Planter Benches. The Movable Planter Boxes are completely self-sufficient and drip-free, equipped with a HDPE tray, Pond Liner and a slotted Galvanized Mild Steel (GMS) Framework. The GMS framework was clad with Steel Grey Granite, Sapphire Brown Granite and Tan Brown Granite. The slotted framework enabled flexibility with the height of the plants and planters placed inside the boxes by moving the HDPE trays up or down. The Pond Liner ensured that the water and mud does not drip out onto the floor. Each planter box weighs between 120 and 450 KGs and can be moved easily with the help of a forklift.

The Fixed Planters are low height plant enclosures with a Galvanized Steel Framework, clad with Sapphire Brown Granite and Steel Grey Granite.

The landscape deck is the green area, with benches and large planters meant for relaxation in the middle of the airport.

EXTERNAL AND INTERNAL WATER FEATURES

The External Water Features include five water bodies at the rotaries along the landscaped areas of the terminal, using 150 tonnes of Steel Grey Granite. These step fountains are made of 80, 100 and 150 mm thick pre-cut, polished, grooved, tapered and numbered solid pieces of granite processed at the Odyssey unit in Ongole.

The water cascade at the arrival lounge is the sole Internal Water Feature, made as a combination of Raw Silk Ivory, Lavender Blue and Steel Grey Granite. The pieces are grooved and

Indira Gandhi International Terminal 3 - Building Information

Typology: Public Utilities
 Name of Project: Terminal 3, IGI Airport
 Location: New Delhi
 Name of Client's Firm: GMR
 Contact Person: Mr. Solanki
 Address: New Uddan Bhawan, Opp. Terminal-3, IGI Airport, New Delhi
 Tel No: 011-25661000
 Email: info@gmrgroup.in
 URL: www.gmrgroup.in
 Principal Architect: EDAW/AECOM, Hong Kong
 Built-Up Area (sq ft & sq m): Hardscape, External and Internal Water Features
 Start Date: May 2010
 Completion Date: Sep 2010
 Photographer: Ms. Ruchika Grover
 Photographer: rajesh suneja
